HOW COURSES ARE CONDUCTED

Our courses are mainly one day in duration, held at Your Company/ Site or Our Training Venue in KZN and they are conducted by experienced and qualified Assessors.

There is a choice between a 1-day Short Learning Programme (SLP) or a 3 Day NQF Qualification.

We are available to come to your business to train your employees in Working at Heights, Scaffolding, Health & Safety, First Aid, Fire Safety, Forklift Driving, Mobile/Overhead/Truck-Mounted Cranes, Rigging, Hand & Power Tools Safety and much more.

We are fully accredited with the following SETA's: TETA, CETA, Services SETA and HWSETA and we are also registered with the Department of Labour (DOL) and SAIOSH

Each employee trained is issued with a Certificate of Competency and also a Drivers Permit in the case of Forklifts, Cranes & Machinery.

Our courses are fun and informative. No learner feels intimidated at any time due to second language impediments. We cater for all intellectual levels from low level employees to Managers.

We accommodate isiZulu speaking employees in our training as well.

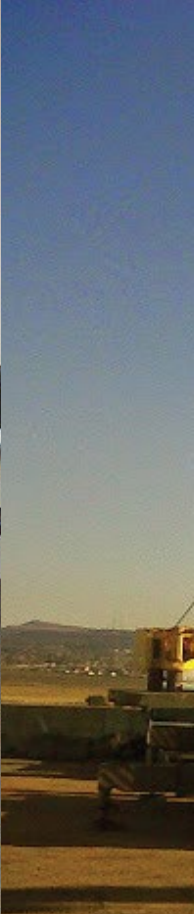

Recognition of Prior Learning (RPL) is taken into account and courses can be shortened accordingly.

A speciality of our service is to tailor-make specific courses for your Company. Our courses are fun to attend but extremely informative.

We pride ourselves in competitive prices and excellent service. All of our clients form meaningful long-term Customer Relationships with us over the years.

TYPICAL EXAMPLES OF ON-SITE TRAINING

SOMETHING CLIENTS SHOULD BE AWARE OF

Causes of Accidents

The three contributing factors that result in accidents are as follows.

- Unsafe acts 88%
- Unsafe conditions 10%
- Acts of providence 2%

98 % of all accidents can be prevented due to the causes of these accidents are things people do wrong in the work place.

2 000 000 Accidents were investigated and it was found that for every one major accident that caused death or disablement there can be 10 accidents that only caused minor injuries where only First Aid treatment was required, and 30 accidents that caused property damage.

Having an indemnity notice displayed, is not sufficient for liabilities in the workplace if the working environment is unsafe and a visitor gets injured or dies. If a person, other than an employee, is injured, dies or becomes ill as a result of being on your premises, the company is liable for all medical expenses. The visitor also has the right to make a civil claim against the company. In the event of a fatality, the charge is culpable homicide.
